

CEBORA Synergic MIG Welder # 572

This machine is recommended and/or approved by BMW, KIA, Lexus, Mazda and Toyota

The Synergic MIG Welder #572 is a 220 volt single phase mig welder with output power ranging from 25 amps to 200 amps. Designed and developed for today's collision repair shop, the Synergic Mig 572 is supplied with built-in synergic programs for welding high strength steels, MIG brazing and galvanized steel. This welder is capable of welding aluminum with trouble free wire feed when using the optional Push-Pull gun #2003. The built in programs may be updated easily via the internet by using the optional Interface Kit #136.

- Mig Brazing of galvanized metals
- Aluminum Welding
- Safe to use near computers, PTC, etc.
- Pre-programmed settings for fast & easy set up.
- Push-Pull Gun capable for trouble free aluminum wire feed.
- Download updates to keep you current to the newest welding programs.

CONTROL PANEL

- A. Selection key
- B. Welding program indicator LED
- C. Spot welding time indicator LED
- D. Stitch weld time indicator LED
- E. "Burn Back" indicator LED
- F. Thermostat tripped indicator LED
- G. Push-Pull Gun LED
- H. Connector for Mig Gun
- I. Push Pull gun connector
- L. Ground cable connector
- N. On/Off & Voltage range selector
- P. Wire speed & current adjustment
- Q & R. Adjustment keys
- S. Display

Technical Specifications

- 220 volt single phase @ 40 amps 50/60 Hz
- Output power : 25 - 200 amps
- Duty Cycle 25% @ 150 amps 100% @ 70 amps
- Mig Gun is sold separately. Uses Standard gun MB15, Heavy Duty 1242 or Push Pull Gun 2003
- Power cord 8" (2.5 m)
- Ground cable 9' (3 m)
- Dimensions: 21" x 33" X 26"
- Weight: 112 lbs (51 kg)
